Abdelaziz Snoussi

Final-Year Computer Science Engineering Student

Tunis, Tunisia · +216 20 489 677 · abdelaziz.snoussi@ensi-uma.tn · LinkedIn · GitHub

Seeking a 6-month final-year internship (PFE), available full-time and on-site from February 2027

PROFILE

Final-year engineering student at ENSI with hands-on experience in backend and full-stack development (Python/FastAPI, Java/Spring Boot, Angular) and in integrating AI building blocks: NLP, OCR and RAG. Used to owning a project end to end and working independently, with a strong algorithmic foundation from competitive programming.

EXPERIENCE

Software Engineering / AI Intern — Amsys Consulting, Tunisia · *Summer 2026*

- Built, on my own, an API that secures documents shared with external partners: sensitive data is identified with NLP, then masked.
- Designed the API and the document-processing pipeline with Python and FastAPI.
- Reviewed the state of the art in sensitive-data detection, including Microsoft Presidio.

Software Engineering Intern — Talan Tunisie, Tunis · *July – August 2025*

- Built, on my own and in two months, a website for the company canteen: the chef lists available dishes and employees place their orders.
- Full-stack application: Spring Boot (backend), Angular (frontend), PostgreSQL; APIs tested with Postman.

PROJECTS

ARDHI – Agricultural Decision Support · *Academic project, team of 4* · FastAPI, Flutter, Tesseract, Llama, RAG

- Application that simulates plant growth under given environmental conditions, using a database, and recommends to farmers what to plant and how to care for it, based on their location or a report they submit.
- My part: extraction of information from submitted documents using OCR (Tesseract, with Llama as a fallback).
- My part: RAG chatbot built on the Llama API, relying on session context and database answers, and respecting scientific constraints and restrictions on what it may answer.

Bus Timetable Web Application · *Academic project* · PHP, MySQL, HTML, CSS, JavaScript

- Web application for consulting bus schedules.

SKILLS

- **AI / Data:** NLP, OCR (Tesseract), RAG, LLMs (Llama API)
- **Backend:** Python, FastAPI, Java, Spring Boot, REST APIs
- **Frontend:** Angular, Flutter, JavaScript, HTML/CSS
- **Databases:** PostgreSQL, MySQL, SQL
- **Languages:** Python, Java, C++, C, PHP
- **Tools:** Git, GitHub, Linux, Postman
- **Spoken languages:** Arabic (native) · English (advanced) · French (intermediate, B1–B2)

EDUCATION

National Engineering Degree in Computer Science — expected 2027
National School of Computer Science (ENSI), Manouba

Preparatory Cycle, Mathematics–Physics — 2022 – 2024
IPEIEM, El Manar, Tunis

COMPETITIVE PROGRAMMING

- Codeforces: currently 1560, peak 1733 (Expert).
- Winner of the ENSI Programming Challenge (EPC) 2025 and the ISAMM Beginners Contest 2025.
- 11th at TCPC 2026.
- Problem setter for a programming contest organized by ENSI.
